Dear Federal Government Director:

Enclosed you will find a poster announcing the Hubert H. Humphrey Institute of Public Affairs master of arts (M.A.) and master of planning (M.P.) programs. We would appreciate your displaying the poster and bringing it to the attention of your staff or others who inquire about graduate study in public affairs.

For those interested in preparing for careers as managers, policy analysts, advocates and planners in government, non-profit and private organizations, the Humphrey Institute offers a number of unique features.

- Public affairs education at the Humphrey Institute spans a wide variety of disciplines, ranging from quantitative methods to ethics, and is particularly concerned with an integrative understanding of how different skills and knowledge contribute to the resolution of public problems.
- The graduate programs aim to develop leaders and public affairs professionals who combine a high degree of professional competence with an understanding of public goals and how to reach them.
- The programs are flexible. While there is a common integrative core of courses required of all graduate students, the programs permit a range of options, both for development of professional competence in management, planning, policy analysis and advocacy, and for concentrated study of areas such as social policy; economic and community development; technology, energy and environment; land use and human settlements; and foreign policy. Special programs are tailored to individual needs and career goals within a framework designed to ensure professional competence. A number of dual degree programs are available.
- The Institute's faculty includes scholars and public practitioners who bring real-world expertise into the classroom. There is a beneficial exchange among roles, disciplines and professions.
- Through seminars and assistantships students may participate in an extensive program of action-oriented policy research projects.

Page Two

- The Humphrey Institute's location within a great research and land grant university gives students access to a wide variety of specialized courses and programs.
- Minnesota and the Minneapolis-St. Paul area are known as places where government is forward-looking and at the same time responsive to an active and responsible citizenry, where businesses exhibit a high level of entrepreneurship, and where corporations have made major investments in the community's social and cultural life. Humphrey Institute students have a rich local environment within which to study, to serve as interns, and to participate in public life.

Our financial aid packages are among the most attractive in the country and range in value up to \$16,800. Of particular interest to those working in government is the Albert R. Rathert Fellowship in Public Administration and Management. This fellowship is for a qualified individual who has held an administrative position in government for three or more years.

If you need further information about our curriculum, please do not hesitate to contact me.

Sincerely,

  
Robert T. Kudrle  
Professor
